

48 Frame Air Mover Motor

Imperial Electric gear motors are built to last. The Imperial Electric 48 frame air mover motor delivers 2 or 3 speed performance for air moving applications in OPAO installations. These 1/3 and 1/2 horsepower motors feature ball bearing supported output shafts for long life performance. All motors are UL approved and feature thermal protection, and multiple mounting configurations are available.

Specifications

- 120 or 230VAC, 50/60Hz
- OPAO (open air over) enclosure
- 1/2" x 3.5" output shaft

Features

- Ratings from 1/4 - 3/4 hp
- Two and three speed versions
- 1/3 and 1/2 hp are UL approved thermally protected
- All models are UL component recognized
- Ball bearing
- Typical high speed 1100 rpm at 60 hz
- Permanent split capacitor
- Various mounting configurations available

Applications

- Professional floor care
- Air movers
- Building ventilation
